

Operations Phase Flowchart

In faction order, one faction completes both its Sub-Phases before the next faction starts its Operations Phase. A faction completes its Actions Sub-Phase before starting its Supply Check Sub-Phase. **Faction order is Axis and Western.**

Actions Sub-Phase (1.2.1 and 6.0)

- The phasing faction may perform Actions (6.0) with its units.
- Actions may be performed in any order. Unless stated otherwise, one unit's action must be completed before another unit is activated. However, certain procedures within them may have a strict order.
- While playing, a Conditional Event may be triggered (see Sequence of Play Flowchart). Resolve it immediately.
- *After all Actions are done, perform Marker Removal.*

Special Marker Action (6.1)

Airdrop (13.1)
Partisans (13.6)
Surprise Attack (13.9)

Take a marker listed below from its Faction Card's Events box and put it in a hex as follows.

Airdrop: Within a 3-hex range of an air unit of the same nationality. The Western marker may be within range of a UK or USA air unit.

Partisans: That contains an enemy: air or ground unit and is within an active or conquered friendly country.

Surprise Attack: No restriction unless being used to perform an Amphibious Invasion. If performing an Amphibious Invasion, the hex must contain an enemy or friendly port.

Placement Restrictions: For other placement restrictions and effects, see that marker's specific entry in Event Markers (13.0).

Air Actions (6.2)

Air Rebase (6.2.1)
Air Strike (6.2.2)
Air Support (6.2.3)

Activate an air unit in a hex to perform an Air Action.

Activating an air unit does not cost production points.

An air unit with 6 Sorties or marked with a Strategic Move marker cannot be activated. *Check a unit's Sorties each time you want to activate it.*

An air unit can be activated multiple times in a phase.

An air unit can perform the same Action multiple times.

More than one air unit can be activated in a phase.

Ground Actions (6.3)

Army Operations (6.3.1)
Amphibious Invasion (6.3.2)

Activate a ground unit in a hex to perform a Ground Action.

A ground unit marked with a Strategic Move marker cannot be activated.

To activate a ground unit (regardless of its strength or Supply State) its country must spend production points based on the type of unit (3.2.2.1).

- Leg unit costs 1 production point.
- Mobile unit costs 2 production points.

A ground unit can be activated only one time in a phase.

Only one ground unit can be considered activated at one time.

More than one ground unit can be activated in a phase.

Marker Removal: After all Actions are done, remove any Assault, Airdrop, Partisans, or Surprise Attack marker in a hex.

Supply Check Sub-Phase (1.2.1 and 7.2)

Each phasing unit in a hex checks to see if it can trace a supply line back to a friendly supply source. If it cannot, its supply state is reduced one level (only once per turn).

A supply check is not mandatory. The phasing faction may choose to not supply any number of its units (regardless of type or location).

Combat Resolution Sequence (5.1)

- Step 1)** *Ground Combat Only:* If it is a Mobile attack, the attacking unit is the Primary Attacker. If it is an Assault attack, the attacker declares one unit as the Primary Attacker and up to two others as Additional Attacker units.
- Step 2)** Each side uses a Will Commit / Will not Commit marker to secretly decide if it commits any of the following to the combat. Both sides simultaneously reveal their markers and then alternate declaring what they will commit.
- Any number of Event markers as per their rules.
 - Ground Combat Only: **One** air unit.
- Step 3)** *Ground Combat Only:* If both sides committed an air unit in Step 2, resolve an air combat to determine which side might apply the Air Support ground combat DRM. After the air combat is done, proceed with Step 4 for the ground combat.
- Step 4)** Each side determines its **own** Combat DRM per the respective DRM list. The maximum total DRM a side can apply to its combat roll is + or - 10. *Do not combine both sides' modifiers and apply the result to only one side.*
- Step 5)** Each side rolls one die and applies its own total DRM. Each side then checks the respective DRM list under "**After Rolling Combat Die**" to see if it divides its **modified** combat roll result by two. A final value less than 1 is changed to 1.
- Step 6)** On the Combat Results Table, cross-reference the attacker's final value across the top with the defender's final value down the side. After applying the result, the combat is over.

Air Combat DRM

Attacker or Defender	Defender
+2 Germany unit	+2 Western unit defending in Britain versus Air Strike originating from outside of Britain
+1 UK or USA unit	
-2 Bomber unit	
-2 Low Supply	
-2 Defender's hex is affected by Poor weather. <i>Applies to attacker and defender.</i>	
-? Number of Sorties	
+/-? Per each Event marker's effect	

After Rolling Combat Die and applying DRM

Attacker or Defender

The modified die result is divided by two for each of the following that applies. Round up after each division.

- Unit has No Supply.
- Defender's hex is affected by Severe weather. *Applies to attacker and defender.*

Air Combat Results (5.2.1)

Perform steps one and two below.

Step 1: Sorties

Add Sorties to each unit based on the CRT result received.

♦: Attacker and Defender each add one Sortie.

DR, DD, DE: Attacker adds one Sortie. Defender adds Sorties equal to the + # part of CRT result.

AS, AA: Defender adds 1 Sortie. Attacker adds Sorties equal to the + # part of CRT result.

Step 2: Effect

Check the list below to determine other effects.

- If the combat was an Air Strike, the combat is over.
- If the combat was due to both sides committing an air unit to a ground combat, see **Air Support** below.

Air Support

♦, **DR, AS:** Attacker and Defender each receive the Air Support ground combat DRM.

DD, DE: Attacker receives the Air Support ground combat DRM. Defender does not.

AA: Defender receives the Air Support ground combat DRM. Attacker does not.

Ground Combat DRM (5.3.4)

Assault or Mobile Attack	Assault Attack - Additional Attackers
Primary Attacker or Defender	Up to two Additional Attackers per Assault
+2 Germany unit	+1 per Additional Attacker of any unit type
+1 France, UK, or USA unit	+1 per Additional Attacker Tank unit and defender's hex is affected by Fair or Poor weather. <i>In addition to the "any unit type" DRM above.</i>
+1 Elite unit <i>Unit has a star symbol</i>	
-2 Reduced strength	
-2 Low Supply	
+2 Tank unit and defender's hex is affected by Fair weather	
+1 Tank unit and defender's hex is affected by Poor weather	
+2 Receiving Air Support and defender's hex is affected by Fair weather	
+1 Receiving Air Support and defender's hex is affected by Poor weather	
Primary Attacker	Assault Attack - Amphibious Invasion
+2 Attacking an Isolated* unit. <i>*Defender has no eligible retreat hex and it is not adjacent to a friendly: city, fort, or ground unit.</i>	Primary Attacker
-1 Attacking into a Poor weather hex	-1 Attacking into any hex as part of an Amphibious Invasion Resolution
-1 Attacking into a hex containing a city and / or any amount of Rough terrain. <i>This is -1 in total, not -1 per each type of terrain in the hex.</i>	+2 Receiving Naval Support and defender's coastal hex is affected by Fair weather
-1 Attacking across a Canal, Mountain, or River hexside	+1 Receiving Naval Support and defender's coastal hex is affected by Poor weather
-2 Attacking across a Strait hexside	
Attacker or Defender	After Rolling Combat Die and applying DRM
+/-? Per each Event marker's effect	Assault or Mobile Attack
	Attacker or Defender
	The modified die result is divided by two for each of the following that applies. Round up after each division.
	- One or more of a side's ground units has No Supply. - Defender's hex is affected by Severe weather. <i>Applies to attacker and defender.</i> - Attacking a unit that occupies a fort. <i>This can only be an Assault attack.</i>

Ground Combat Results (5.3)

Important: For all results, ignore the + # part of the CRT result.

♦: **No Effect** - The combat is over.

DR: Defender Retreat (5.3.5)

If the defender does not occupy a fort, it must retreat one hex away from the attacker (any attacker in an Assault). If it cannot retreat, apply the **Defender Cannot Retreat** result below.

If the defender occupies a fort, its faction chooses to either retreat one hex from the attacker (any attacker in an Assault) or apply the **Defender Cannot Retreat** result below.

DD: Defender Disrupted

If the defender is a reduced unit, eliminate it. Then, if it was a Mobile attack, put a No EZOC marker in the defender's hex.

If the defender is a full strength unit, reduce it. Then, the defender (even if it occupies a fort) must retreat one hex away from the attacker (any attacker in an Assault). If it cannot retreat, apply the **Defender Cannot Retreat** result below.

DE: Defender Eliminated (5.3.6)

Eliminate the defender (whether it is full strength or reduced). Then, if it was a Mobile attack, put a No EZOC marker in the defender's hex.

AS: Attacker Stopped

The combat is over and the attacker's activation ends for the phase.

AA: Attacker Attrition

If the Primary Attacker is a reduced unit, eliminate it.

If the Primary Attacker is a full strength unit, reduce it.

The combat is over and the attacker's activation ends for the phase.

Retreat Prohibitions (5.3.5.1)

- A unit cannot retreat into an enemy: city or fort.
- A unit cannot retreat into a hex with an EZOC unless the hex contains a friendly: city or fort, and the unit is also putting a one hex gap between it and the attacker.
- A unit cannot violate ground movement prohibitions or stacking limits.

Defender Cannot Retreat (5.3.5.2)

If the defender is a reduced unit, eliminate it. Then, if it was a Mobile attack, put a No EZOC marker in defender's hex. The combat is over.

If the defender is a full strength unit, reduce it. The unit stays in its hex and the combat is over.

Attacker → Combat Results Table

Movement (4.0)

Unit Movement Points (4.2)

Leg ground unit with: Full Supply 8 MP / Low or No Supply 4 MP
Any other unit type with: Full Supply 10 MP / Low or No Supply 5 MP

Cost Ground Movement (4.2.3)

1 Clear hex

1 Along a Transport Line. The terrain of the hexside being crossed and in the hex being moved into is treated as Clear. **[Exception:** This benefit is not received if moving or attacking into a hex containing an enemy: city, fort, or unit.]

1 Friendly: City or Fort in any type of hex

2 Enemy: City or Fort in any type of hex

2 Rough hex (Desert, Hills, Swamp, or Woods) with no City or Fort.
If a city or fort is in the hex, see Friendly or Enemy above.

+0 Clear hexside

+1 Canal, Mountain, or River hexside

+2 Strait hexside

+1 Attacking a unit in a hex affected by Fair weather

+2 Attacking a unit in a hex affected by Poor or Severe weather

All MP: Moving via Naval Transport

Prohibited: Water hex or hexside; Faded Dot hex; or per scenario rules

Cost Air Movement (4.2.2)

1 Any hex, including Faded Dot

All MP: Moving via Naval Transport

Prohibited: Per scenario rules.

Note: Only +# movement point costs are cumulative with other costs.

Weather (10.0)

Balkans, FNA, Italy

All Other Maps

Month	Fair	Poor	Severe	Fair	Poor	Severe

Nov (Oct Sev)	1-3	4-6	-	1-2	3-6	-

Production (9.0)

Cost Ground Unit Activation (6.3)

1 Activate a Leg ground unit

2 Activate a Mobile ground unit

Replacements (8.1)

1 Turn over a reduced Leg ground unit to full strength

2 Turn over a reduced Mobile ground unit to full strength

3 Remove up to 2 Sorties from one fighter unit

4 Remove up to 2 Sorties from one bomber unit

Mobilization (8.2)

1 Mobilize a reduced Leg ground unit

2 Mobilize a reduced Mobile ground unit

3 Mobilize a fighter unit with 4 Sorties

Ranges (1.4)

Air Strike: 7 hexes

Air Support: 5 hexes

Airdrop: 3 hexes from an air unit of the same nationality

Partisans: In a hex containing an enemy ground unit that is within a friendly, active or conquered Allied country.

Supply Line Across Land Hexes: Up to 2 hexes at start of trace, then unlimited along a Transport Line

Supply Sources (7.3)

Limited Supply Source (7.3.1)

Supplies up to **two** units, giving each a **Low** supply state.

- A friendly capital in a conquered country is for the units belonging to the faction controlling the city.
- A friendly capital without a port in a Western country is for UK or USA units.

Unlimited Supply Source (7.3.2)

Supplies any number of units, giving each a **Full** supply state.

- A friendly country's city is for that country's units.
- A friendly city in Britain is for USA units.
- A Western friendly port outside of Britain is for up to two Western units. That is two units per port.

National Will Effects (2.1.2)

- 1 To a country, each time one of its **field** ground units is eliminated while **defending** in combat.
- 2 To a country, each time one of its cities **[except its capital]** becomes enemy controlled.
- 4 To a country, each time its capital becomes enemy controlled.
- +2 To a country, each time one of its cities **[except its capital]** becomes friendly controlled after being enemy controlled.
- +4 To a country, each time its capital becomes friendly controlled after being enemy controlled.

Unconditional Surrender!

Western Campaigns

Sequence of Play Flowchart

In faction order: complete one Phase before the next Phase is started. [**Exception:** Weather Phase]

Faction order is Axis and Western.
